/ ABOUT ME

A full stack web developer with a background in animation and visual effects with hands-on experience in client and server side programming, with an attention to detail and passion for learning new skills for development.

/ WORK EXPERIENCE

>> ASSOCIATE SOFTWARE ENGINEER

Infosys | Remote - Richardson, TX | December 2021 to Present

- Trained internally by taking courses in technologies such as Java, Spring, Microservices, React, AWS, and DevOps
- Responsible for learning new technologies at a fast pace and apply the learning to a working project
- Maintain client relationships and ensure client's satisfaction
- Contribute to client projects by meeting application requirements

>> ASSOCIATE SOFTWARE ENGINEER

Revature| Remote | June 2021 to December 2021

- Training program where a specialized stack is chosen
- Trained in technologies such as Java, Angular, Spring, Microservices, DevOps, SQL, JDBC, Servlets, Hibernate, HTTP, REST, and AWS
- Worked on several projects both individually and collaboratively
- Collaborated with a group of 2 other developers for one project, and around 25 for a larger group project
- Had weekly quizzes on subject matter in interview format with possibility to be dropped from program if responses and performance were not adequate

/ PROJECTS

>> DATABASE ADMINISTRATOR

Client Project | August 2022 to Present

An enterprise application for a multichannel video programming distributor involving numerous technologies including cloud computing.

- Work with members from within my organization as well as members from client company
- Monitor files
- Majority of technologies used are AWS, MySQL, and Python
- Single handedly wrote several Python scripts to communicate with MySQL database and execute required tasks
- Work with AWS services such as EC2, S3, RDS, Elastic Beanstalk, Secrets Manager, CloudWatch, SNS, and Compute Optimizer
- Assisted in working with AppDynamics team to install database access agents
- Work in Linux
- Monitor databases and assist with related issues
